

Activities we can do together

Ice Ornaments

You will need:

- dishes of various sizes
- string
- water
- Natural items found in your outdoor space i.e. twigs, leaves, feathers, bits of bark, etc.

Activity:

First fill the dishes with water and collect a selection of items found outside. Next, place your chosen items into the dishes. Then, cut a length of string, fold it in half and place it in the bowl of water, leaving a loop hanging out of the water. This will be used to hang your ornament once it is frozen. Leave the dishes outside overnight to freeze. Once they are frozen, take the ice ornament out of the dish. You might need to use some warm water to help get it out. Finally hang your ornaments up in your outdoor space using the string. Watch what happens when the temperature rises and the ice ornaments start to melt.

Take a picture to share your work of art with us before it melts.
